Welcome to Technical Dual Enrollment. Program at Bishop State Community College:

Bishop State Community College’s Technical Dual Enrollment Program provides high school students a unique opportunity to jump-start their college career. According to the U. S. Department of Education, college credits earned prior to high school graduation reduce the average time-to-degree and increase the likelihood of graduation.

Eligible high school juniors and seniors who have approval of their high school principal may enroll in selected BSCC courses in the Technical Dual Enrollment Program. Under this arrangement the college grants semester hour credit for successfully completed courses, and the credit may be used to meet high school graduation requirements.

Dual Enrollment is advantageous to students because it allows them to get a head start on their college careers. In some cases, the student may even be able to attain an Associate of Arts or equivalent degree shortly before or after their high school graduation. Furthermore, participation in dual enrollment may ease the transition from high school to college by giving students a sense of what college academics are like. Dual Enrollment may also be a cost-efficient way for students to accumulate college credits because courses are often paid for and taken through the local high school.

Dual Enrollment courses may be taught at the high school – day or evening – or at the College as part of its normal campus schedule. We believe that participating in this program will ease the transition from high school to college and prepare the student for full-time enrolment either here at Bishop State or some other institution of higher learning.

This program is a true win-win for the high school, Bishop State, parents and especially the students.
