Job Description

DESCRIPTION:

The Project Engineer is competent in all conventional aspects of Civil Engineering. Plans and conducts work requiring detailed knowledge, judgment and technical capabilities in the independent evaluation, selection, and substantial adaptation and modification of standard techniques, procedures, criteria and can convey same in a technically accurate and efficient manner. Devises new approaches to problems encountered. Requires sufficient professional experience to assure competence as a fully trained and professionally licensed Engineer. Must be competent with Civil Engineering resources such as AutoCAD, Civil 3D, HEC-RAS, WaterGEMS, and other Engineering tools.

DUTIES

1. Assuring all engineering work performed by individual or under his direct supervision adheres to good engineering practice.
2. Handling preliminary design studies, project planning, layouts, and other activities which lead to the engineering of a project.

Job Posting Details

3. Consulting with clients, other engineers, architects, vendors, etc., as necessary to determine the most practical and desirable engineering design in keeping with the budget.
4. Preparing design criteria for engineering projects and equipment.
5. Selecting suitable materials and equipment in accordance with good engineering practices.
6. Preparing accurate estimates of planning, design work and other resources necessary to engineer a project.
7. Writing specifications for materials and equipment in a clear, concise manner.
8. Anticipating information needed and take the necessary action to obtain it.
9. Preparing detailed engineering designs in accordance with good engineering practice, including cost estimates and schedules, and in compliance with all applicable codes, regulations, and restrictions.
10. Organizing, scheduling, and supervising the work of others so as to make the most efficient use of personnel and the allotted budget.
11. Effectively handle complex civil design and water resources projects and can efficiently utilize various company resources to accomplish the intended work.
12. Coordinating, supervising, checking, and assuming responsibility for all work done under his/her direction, including Engineer Associates, Designers, Drafters, and Technicians working on a project for which the Project Engineer is the Engineer of Record.
13. Coordinating work with that of other designers, architects, estimators, purchasing personnel, management, etc., involved in the project.
14. Completing work on time and within the allotted budget and resource estimate.
15. Marketing Thompson Companies' services to current and potential clients and participating in business development activities, providing completed project write-up's, and updated resume information as requested.
16. Ability to effectively communicate both oral and written with clients, regulators, public officials, team members and the public.
17. Following Company policies and procedures regarding safety and quality.
18. On time and regular attendance.
